Documentation for Leap View

Ankit Gupta, Lucy Nam, and Kat Zhou

December 8, 2013

Setting Up Leap

1. Download the software bundle for Leap Motion.

2. Plug it in.

3. If you are having trouble getting Leap Motion to work, check this article for support help.

Using the App

(These images were taken from the Leap Motion website.)

1. Go to the demo folder. Open the file called "leapimgviewer.html" with the browser of your choice.

2. To zoom, hold your hand out, flat, palm down, with fingers spread slightly apart. To zoom in, move your hand down. To zoom out, move your hand up.

3. To pan left and right, swipe left or right.

4. To go to the next picture, make a downward tapping motion, as if tapping a horizontal surface, returning your finger to its original position at the end.

5. To go to the previous picture, make a forward tapping motion, as if tapping a vertical screen.

6. To access the manual, use two fingers to make a downward tapping motion.

7. To reset the image, move your finger in a circular motion.

8. To upload pictures, put the link in the upload box and press upload.
